DISCUSSION: EPA conducted a Site Inspection Prioritization (SIP) for the Southwest Nuclear Company site in Dallas, Texas. The site scored a 0.00 using the PAscore model because no sources were identified which could be evaluated and no site exists at 3100 LBJ Freeway. Since the site scored below 28.5, The Site Assessment Section recommends that the site receive a No Further Remedial Action Planned under Superfund (NFRAP) Decision. The site has been referred to the Texas Natural Resource Commission for possible assessment under the state regulatory authorities.
